

1) We make a move and act a fool while we in the club

2) S: Sentence

PRP: Personal Pronoun

NP: Noun phrase

VP: verb phrase

DT: Determiner

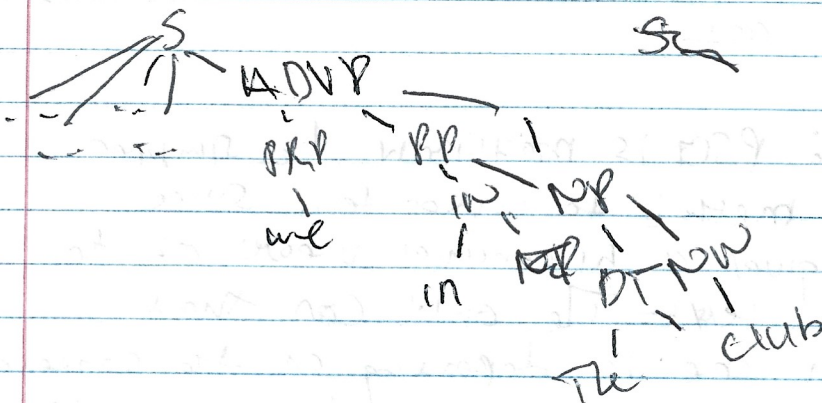

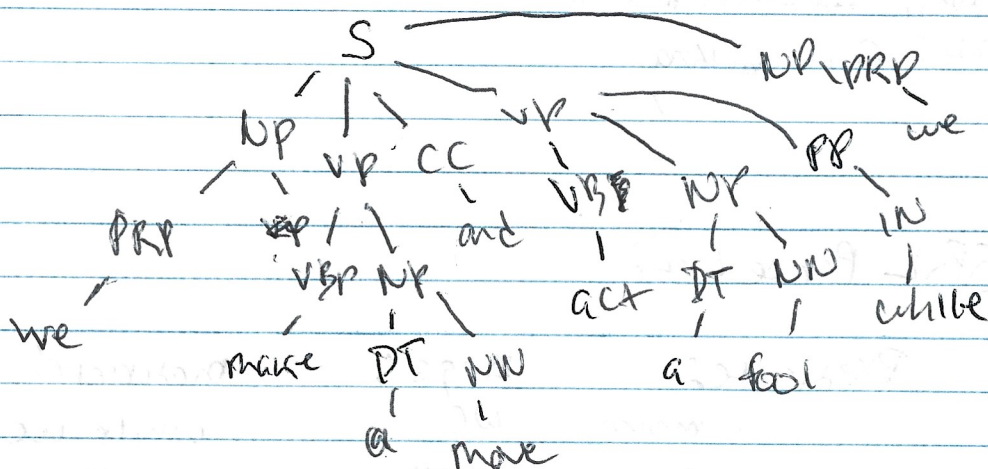

NW: Noun, Singular

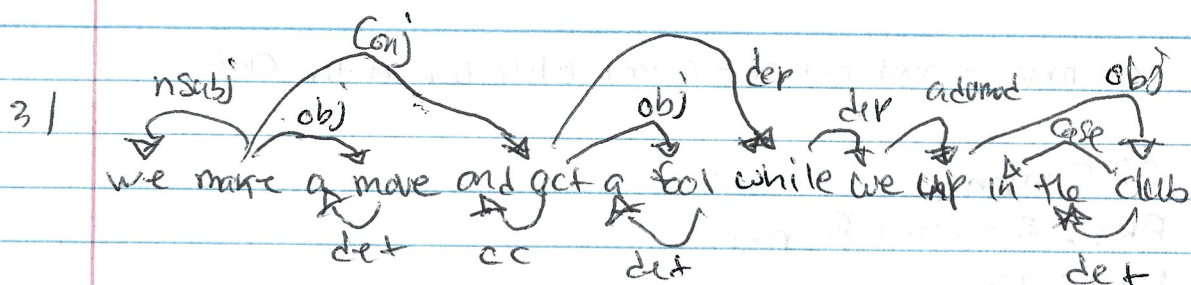

VBP: Verb, non-3rd Person Singular Present

CC: Coordinating Conjunction

IN: Preposition or Subordinating Conjunction

S

Conj: Conjunction  
 nsubj: Nominal Subject  
 obj: object of the verb  
 CC: Coordination  
 det: determiner  
 dep: dependent  
 advmod: Adverbial Modifier  
 case: Case marking

#### 4) SRL Parse List:

Predicate:	Args:	modifiers:
make	we	while we
move	a move	in the club
act		

5) Pros: Cons: PSQ is more like the simpler method to understand since it gives a hierarchical view of the text. The only con that I can see is depending on the sentence it might be difficult to determine the correct parse ~~due to~~ based on the relationship of words.
